

OpenResearch — reproduce any ML paper end-to-end

Root model writes Python → ingest paper → build env → implement & run baseline → score vs. rubric → explore improvements → final_report.{json,md}

Legend: solid arrow = control/data flow; dashed = auth/credential binding; △ = documented rough edge / gotcha.
Universality knobs: --paper-hint→PAPER_HINTS,
--scope-spec, --vram-gb,
OPENRESEARCH_BASELINE_EXTRA_GUIDANCE,
paper_invariants.py.
Baseline paper: SDAR (arXiv 2605.15155).
